

Connect the Dots: Cooling Tower

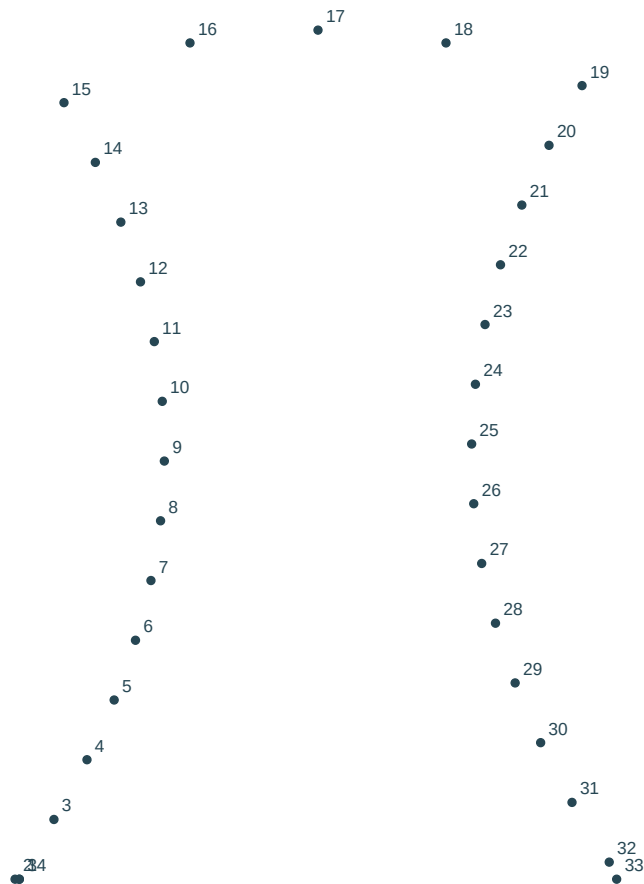

ATOM BEACON

Elementary School (Grades 3–5) • Dot-to-Dot

Nuclear Science Education

Name: _____ Class: _____ Date: _____

Connect the dots in order from 1 to the end to reveal a famous shape you might see at a power plant.

AFTER YOU CONNECT THE DOTS:

You drew a COOLING TOWER. The white clouds you sometimes see rising from one are made of water vapor — just like steam from a tea kettle.

Color it in if you'd like! Fact: Cooling towers can be over 500 feet tall — taller than a 40-story building!

Connect the Dots: Cooling Tower — Answer Key
